Motion To force the United Scavenger
and their blood sucker Dum Ham To
give me access to the internet site after
more than 6 months of dirty tricks to
try to hide the proof of an FBI cover up

Dum Ham is a big or should I say
fat Megala that do his utmost to
send me to Heaven (ALLAH willing)

He refuse to give me access to the
information of the case through the
internet.

As Dunham was put on the job to do
an underhanded killing (of me of course)
it is crucial for him that I don't
get to know all the evidence in my favor

6 months to get an E connection that
must make American Broad on how
incidents they can be to cheat their
way out.

Even if Brennan the Grand Death Judge
orders a "renew" prompt execution of her
connection order, nobody should be
in no doubt that "technical" problems
will make the site CRASH after a very
short time.
