I, undersigned, certify that, on this date, examined Ms. Aïcha Moussaoui, who told me that she had been beaten by her husband.

I observed:

- a peri-orbital bruise with swelling of the left eye, and a small skin excoriation of the lower eyelid.
- a bruise with swelling of the horizontal branch of the lower jaw, on the left.
- multiple round, red marks in the neck area, which could have been caused by finger pressure.
- a bruise in the occipital region of the scalp.

Ms. Moussaoui also complains of multiple contusions to the face, the head, the arms and the thorax.

These are grounds for ordering 4 days of sick leave, save for any complications. There is no need to plan an [Illegible] unless there are complications.

This certificate was drawn up at the request of the interested party and delivered to her personally.
